

Your SINUVA journey has begun

Your physician has prescribed the SINUVA sinus implant as an alternative to surgery to treat nasal polyps. SINUVA delivers medication to shrink nasal polyps for up to 90 days.

- The procedure is done during a routine office visit and usually takes 30-40 minutes from start to finish
- The treatment reduces symptoms of nasal obstruction and congestion and has been shown to improve a patient's altered sense of smell
- SINUVA is not for people with hypersensitivity to corticosteroids or those with nasal ulcers or trauma
- The procedure has risks similar to those associated with other endoscopic sinus procedures, such as nose bleed, injuries to blood vessels, bacterial infection, irritation, or perforation

Please see **Important Safety Information** on the back cover.

INDICATION

SINUVA Sinus Implant is a prescription steroid-releasing (mometasone furoate) implant indicated for the treatment of nasal polyps in patients 18 years or older who have had ethmoid sinus surgery.

IMPORTANT SAFETY INFORMATION

Who should not use SINUVA?

Do not use SINUVA if you are allergic to mometasone furoate or any ingredients of the implant.

What should I tell my doctor before receiving SINUVA?

Before you receive SINUVA, tell your doctor about all medical conditions you have including nasal/sinus problems (such as nasal ulcers or trauma), eye problems (such as glaucoma or cataracts), or any untreated fungal, bacterial, or viral infections.

What are the possible side effects of SINUVA?

Serious side effects of SINUVA can include:

- **Local reactions** including nosebleed and injury to nerves or blood vessels in the nose/sinus.
- **Serious allergic reactions** have happened in patients using mometasone furoate including rash, itching or swelling of the lips, face, tongue, and throat, and breathing problems. Call your doctor right away if you have any of these reactions.
- **Weakened immune system** that may increase your risk of infections. Avoid contact with people who have contagious diseases such as chickenpox or measles. Call your doctor right away if you have been near someone with chickenpox or measles.
- **Adrenal insufficiency** is a condition in which the adrenal glands do not make enough steroid hormones and can cause tiredness, weakness, nausea and vomiting and low blood pressure. Talk to your doctor if steroid effects such as Cushing Syndrome and adrenal suppression appear.

The most common side effects of SINUVA in clinical studies were bronchitis, cold symptoms, middle ear infections, headache, lightheadedness or dizziness, asthma, and nosebleeds. The following adverse reactions have been identified during post-approval use of the SINUVA sinus implant. These events include implant migration, lack of efficacy, nasal pain, headache, and nosebleeds. Tell your doctor if you have any side effects that bother you or don't go away.

Risks related with the insertion and removal of SINUVA are similar to other endoscopic sinus procedures.

SINUVA is made from materials designed to soften over time and may fall out of the nose on its own as polyps decrease or if you sneeze or blow your nose forcefully. The implant will be removed 90 days after placement or earlier at your doctor's discretion.

Contact your doctor immediately if you have any changes in vision, excessive nasal bleeding, symptoms of infection or symptoms suggesting that the implant has moved, such as irritation or a choking sensation in the back of the throat.

You are encouraged to report negative side effects of prescription drugs to the FDA. Visit www.fda.gov/medwatch, or call 1-800-FDA-1088.

For important risk and use information, please see the attached Full Prescribing Information for SINUVA or visit www.sinuva.com/pi.

Welcome to the SINUVA benefits services program

Insurance benefits and coverage assistance provided at no additional cost for patients receiving SINUVA

SINUVA[®]
(mometasone furoate) sinus implant

We will work closely with your physician's office to assist them in obtaining SINUVA for you.

A dedicated Case Manager

will coordinate with your physician's office every step of the way to help ensure you get SINUVA as soon as possible.

1. Benefits Investigation & Verification

The first step in the process is for your Case Manager to look into your insurance coverage for SINUVA.

Coverage information for SINUVA is requested from your insurance company

Case Manager relays insurance coverage and associated costs to your physician's office

Your physician's office lets you know the amount of your copay

2. Prior Authorization

The Case Manager also will help your physician collect and assist with your insurance company's request for medical information needed to cover your SINUVA.

A prior authorization may take between 2 and 30 days, depending on your insurance company

3. Getting SINUVA

Once insurance approves your coverage, your physician will order your SINUVA prescription for delivery to his or her office prior to your procedure.

If you are contacted by either of these specialty pharmacies,

it is important that you communicate with them to confirm the SINUVA order so the SINUVA can be sent to your physician's office:

Orsini Specialty Pharmacy: 847-734-7373.

Call will show on your phone as Orsini Pharmacy, Elk Grove Village

Gentry Specialty Pharmacy: 330-661-6061.

Location is Medina, Ohio. Gentry's email address: info@gentryhealthservices.com

Please contact your physician's office if you have any questions about this process or the status of your SINUVA prescription.
