

# SINUVA™ (mometasone furoate) sinus implant payer coverage

\* As of 8/25/2022

## Disclaimer

Medtronic provides this information for your convenience only. It does not constitute legal advice or a recommendation regarding clinical practice. Information provided is gathered from third-party sources and is subject to change without notice due to frequently changing laws, rules and regulations. The provider has the responsibility to determine medical necessity and to submit appropriate codes and charges for the care provided. Medtronic makes no guarantee that the use of this information will prevent differences of opinion or disputes with Medicare or other payers as to the correct form of billing or the amount that will be paid to providers of service. Please contact your Medicare contractor, other payers, reimbursement specialists and/or legal counsel for interpretation of coding, coverage and payment policies. This document provides assistance for FDA approved or cleared indications. Where reimbursement is sought for use of a product that may be inconsistent with, or not expressly specified in, the FDA cleared or approved labeling (e.g. instructions for use, operator's manual or package insert), consult with your billing advisors or payers on handling such billing issues. Some payers may have policies that make it inappropriate to submit claims for such items or related service.

Individual payer plans may vary. Contracted rates for Buy & Bill will vary.

Monday - Friday, 8 AM - 8 PM ET

or visit [SINUVA.com/hcp/ordering](https://www.sinuva.com/hcp/ordering)

To verify your patient's individual coverage for SINUVA, fax the Patient Enrollment form to 844-745-2358. The Enrollment Form can also be found at [SINUVA.com/patient-enrollment.pdf](https://www.sinuva.com/patient-enrollment.pdf)

### Indication

SINUVA Sinus Implant is a corticosteroid-eluting (mometasone furoate) implant indicated for the treatment of nasal polyps, in patients  $\geq$  18 years of age who have had ethmoid sinus surgery.

### Important safety information contraindications

Patients with known hypersensitivity to mometasone furoate and any of the ingredients of the SINUVA Sinus Implant.

### Warnings and precautions

**Local effects:** Monitor nasal mucosa adjacent to the SINUVA Sinus Implant for any signs of bleeding (epistaxis), irritation, infection, or perforation. Avoid use in patients with nasal ulcers or trauma.

**Ocular effects:** Monitor patients with a change in vision or with a history of increased intraocular pressure, glaucoma, and/or cataracts closely.

**Hypersensitivity reactions:** Hypersensitivity reactions, including rash, pruritus, and angioedema have been reported with the use of corticosteroids.

**Immunosuppression:** Persons who are using drugs that suppress the immune system are more susceptible to infections than healthy individuals. Corticosteroids should be used with caution, if at all, in patients with active or quiescent tuberculosis infection of the respiratory tract; untreated systemic fungal, bacterial, viral, or parasitic infections; or ocular herpes simplex.

**Hypercorticism and adrenal suppression:** If corticosteroid effects such as hypercorticism and adrenal suppression appear in patients, consider sinus implant removal.

### Adverse reactions

The most common adverse reactions observed ( $>$  1% of subjects and that occurred more frequently in the treatment group compared to control) in clinical studies were asthma, headache, epistaxis, presyncope, bronchitis, otitis media, and nasopharyngitis.

### Postmarketing experience

The following adverse reactions have been identified during post-approval use of the SINUVA sinus implant. These events include implant migration, lack of efficacy, nasal pain, headache, epistaxis.

**Rx only. Please see attached Full Prescribing Information for SINUVA also available at [SINUVA.com/PI](https://www.sinuva.com/PI).**
